

Amanda Marshall, Let's Get Lost

We've done our cold time, you and I
Fought off the raging of this northern sky
And heaven knows I wanna compare the ocean to your eyes
Baby, let's fly
Doin' hard time, day to day
Huddled beneath this winter sun all frozen grey
You lose your freedom while you watch the season slip away
But not today

Chorus

Livin' in the darkness, baby
Comin' all undone
Been a cruel December, now we're prayin' for the sun
By the time the storm rolls in, we could be long gone
Baby, let's get lost til the days get long
Just you and I
Frost on the outside brings a chill within
Seems like we hide our hearts away when the days get dim
Let's shake it off, let's shake it up
We're not the kind who just give in
So let's begin

Chorus

Voices in your head say stay
I can hear them too
But those doubts'll fade away
In our room with a view
There's a sweet breeze blowin' somewhere, baby
All you gotta do
Is tell me that it's time to go
And I'll be there with you
Chorus repeat
