

Amerie, Can We Go

Let me sit down and tell you how this thing has really started
When I come around you act like loving you is under audit
So baby can you give me just little more (time)
Cause I'm having problem's trying to read your (mind)
I really don't know what to do with you
I was too into you now I'm through with you

[Chorus]

Can we go
Can we go back (to where love is)
Can we go
Can we go back (to where love is)

Pretty memories coming back to me but I remember
What you said to me when you walked away the other day
Is what I remember most
Trying to get past the things you said
Holding on to all the love I thought we had
Wishing I could just replace
Trying to erase all the pain

[Chorus]

Girl you know I can't forsee this
I wanna try but I can't deny this feeling

Baby think of what you're saying
Can we try cause I won't stop believing

[Chorus 2x]
