

Amplifier, Glory Electricity

Beneath the electrically powered sun
Well I've been rolling down the assembly line
And I've been stuck in flesh for far too long
And flowing free's been on my mind
Just like an electric shock

Become a rainbow one hundred foot tall
Just flick a switch to turn it on
Be my metallic and conductive girl
And we'd be like colours that the heavens spun
As we sang along

Glory! Glory!

And you're so uplifting
This feeling that you're giving me
Is pure acceleration
Some kind of chemistry
Whatever's washing over me
Is pure intoxication
And you're pure acceleration
So let's raise hands and rejoice
Like electricity
You are my remedy

Now that I'm polarised - 240 Volts
Yes I'm black and white on a cinema screen
I'm so energised I'm gonna burst
But you've gotta charge me first
And glory electricity the way you power me
Well glory electricity the way you shower me

Glory! Glory!
