

# Amy Diamond, We Could Learn A Lot

Out in the darkness  
Lightyears from home  
Galaxy distant  
Planet unknown

Somebody's watching  
Life here on earth  
Somebody's out there  
We're not the first

We could learn a lot  
We could learn a lot  
We could learn a lot from you

Can you travel space and time?  
Do you have a face like mine?  
Are you far from humankind?

Don't you want to say hello?  
Maybe spend a week or so with us  
Don't you want to say hello?  
Maybe spend a week or so with us

Pluto and Saturn  
Venus and Mars  
Meteor showers  
Infinite stars

Other dimensions  
Yet to be known  
Somebody's out there  
We're not alone

We could learn a lot  
We could learn a lot  
We could learn a lot from you

Can you travel space and time?  
Do you have a face like mine?  
Are you far from humankind?

Don't you want to say hello?  
Maybe spend a week or so with us  
Don't you want to say hello?  
Maybe spend a week or so with us
