Ana Johnsson, The Harder We Fall

Gone astray, it seems we lost our way Come to learn the price we pay Bought it all to fill the empty space How did it get this far?

Lost track what we're looking for Got everything but we still want more When we've been drifting too far The harder we fall Going blind staring at the sun We feel on top as we come undone When we keep wanting it all The harder we fall (the harder we fall)

Wide awake but still I'm feeling numb (feeling numb) I can't believe what we've become For all that's real I know we can't go on How did it get this far

Lost track what we're looking for Got everything but we still want more When we've been drifting too far

The harder we fall
Going blind staring at the sun
We feel on top as we come undone
When we keep wanting it all
The harder we fall

And through it all, the fact remains the same We choose to fall 'cause we don't wanna change The higher we climb, the harder we fall

Gone astray, it seems we lost our way

Lost track what we're looking for Got everything but we still want more When we've been drifting too far The harder we fall Going blind staring at the sun We feel on top as we come undone When we keep wanting it all The harder we fall

The harder we fall...
