

Ananda Project, Breaking Down

patiently I wait for you to come to me
can't you see me breaking down
it's another day without sleep
it's another night without dreams
full moon
and my eyes are wide
I will wait for you
till the sky turns blue
when the time is right
make me dance
make me move in time
I can't go to sleep
when I hear the beat
I come alive
patiently I wait for you to come to me
can't you see me breaking down
it's another day without sleep
it's another night without dreams
kiss me deep
don't leave with life
all night all day
I just can't wait
you make me high
hey, baby
where you been this time
your insatiable
and I just can't hold
all my love inside
patiently I wait for you to come to me
can't you see me breaking down
it's another day without sleep
it's another night without dreams
