

Anders Holst, Make It Shine

If I could only make it better
I would
If I could only make it stronger
I would
If I could only leave behind
Those spoken words of mine
And make it all shine!
If I could only make it harder
I would
If I could only make it brighter
I think I should
Raise myself above it
And see it the way you saw it
It might've bought us some time
And made it all shine!
If I could only be that man
And off and on I think of yesterday
I refuse to see it wasted
With the two of us enshrined in love sublime
The sweetest one I've ever tasted
If I had only taken one step
At a time
If I had only tried to see
The other side
Reaching out my hand
Across the wasted land
To help us understand
To make it all shine!
If I could only be that man
And off and on I think of yesterday
I refuse to see it wasted
With the two of us enshrined in love sublime
The sweetest one I've ever tasted
One day I am sure we will listen
To the words we said today
Someday day I know we'll be missing
Those days that came our way
I could've raised myself above it
And see it the way you saw it
Make it all shine!
It's gonna take some time
To be that man
