

Andreas Johnson, Honeydrop

When she arrives... its already over
When she allows me in... Im already gone
Into the wild space
Where in that cool face
Watching my honeydrop explode
Those honey lips wont leave me cold
When she escapes with me...
honeydrop is all I need
When she arrives... I crush out of slumber
When she belongs to me...
Im already under
Where in that cool face
Into her wild space
Watching my honeydrop explode
Those honey lips wont leave me cold
When she escapes with me...
honeydrop is all I need
When she arrives
everything will come so clear
When she arrives
all my bad will disappear
Into her wild space
Watching my honeydrop explode
Those honey lips wont leave me cold
When she escapes with me...
honeydrop is all I need
Ooh,
honeydrop is all I need
Beneath the waves I'm free
The honeydrop is all I see
When she arrives...
