

Andy Gibb, Dance To The Light Of The Morning

(written by Andy Gibb)

I feel at home in the country
And it makes me feel like I'm happy
And my hands touch the sky
And I feel more alive than I've ever known
Oh yeah

But you understand what I'm feeling
And it makes me feel like we're learning
And you've nothing to hide
'cause you've shown it inside
And it says so much , it does

But that's not me
I'm not that man
I live for my world
And I do all I can , come what may
With the night on our side we can dance to the light of the morning
With a sweet country song just to help things along , oh baby
We'll run hot and run cold till the night grows old
And we're back in the dawn again

You're the light of my life , I rely on
And you're brighter than stars that I cry on
And you're closer to me than I think you should be
But I can't let go

But that's not me
I'm not that man
I live for my world
And I do all I can , come what may
With the night on our side we can dance to the light of the morning
With a sweet country song just to help things along , oh baby
We'll run hot and run cold till the night grows old
And we're back in the dawn again

Whisper of the wind's my only friend
With the night on our side we can dance to the light of the morning
With a sweet country song just to help things along , oh baby

With the night on our side we can dance to the light of the morning
With a sweet country song just to help things along , oh baby
With the night on our side we can dance to the light of the morning
With a sweet country song just o help things along , oh baby

(repeat last verse and fade out)
