

Animal Planet, Ultimate Groove

Animal Planet
Miscellaneous
Ultimate Groove
I got an aching head
My eyes on fire
I think I'm paralyzed
With desire

I know
You know

There's a place not to far from here
Where wolves howl at the moon
And if you click your heals just now
You'll find the ultimate groove

Lay down your axe to grind
Spit out that bitter pill
Deep breath will ease the mind
And bring us closer still

I know
You Know

There's a place not to far from here
Where wolves howl at the moon
And if you click your heals just now
You'll find the ultimate groove

That's what I got in mind
Create some new old times
That's what I got in mind
So let's groove

I know
You know

There's a place not to far from here
Where wolves howl at the moon
And if you click your heals just now
You'll find the ultimate groove

And so and so and so she said
You know it's all just in your head
And if you work your demons through
All your dreams will come true
