

# Annie, Hey Annie

(\*Annie, P. Epworth, H. Bjornsdottir)

Hey Annie

Do you want more baby?

Do you want more?

I want more baby

I want more

Jump up down from the top to the floor

I want more baby I want more

Let the music play

I close my eyes

You know I feel for you

Hold my hand and tell me

&quot;I don't ever want to live without you&quot;

The beat goes on and on

I can't go wrong when it is just you and I

Caught between the presence and a future

That is left to decide

It might take forever

We could grow and change together

If you listen you might discover

A new sound

A new voice

A new love

If we put our hands together

Yeah, we're all here for the better

In the music you might discover

A new pulse

A new beat

A new love

Hey Annie

Do you want more baby?

Do you want more?

I want more baby

I want more

The time has come for me to seek the moment

And to tell you the truth...

Our mind were off

But baby, we made it through

I can't believe I'm standing here

I'm static baby can't even move

I'm looking for the future

With a choice

And not a second to lose

It might take forever

We could grow and change together

If you listen you might discover

A new sound

A new voice

A new love

If we put our hands together

Yeah, we're all here for the better

In the music you might discover

A new pulse

A new beat

A new love

Will you be around

From this moment on

Baby come around

Dance with me

You know I'll be there

Show that you that I care

You know it started here

Dance with me

Just dance with me
