Anthrax, Earth on Hell

The kids have gone wild in the streets I'm backing the havoc they wreak It's time for the fall, so say we all Starter of anything, ender of everything Coming to kick you to sleep The damage inflicted is gonna be deep Cheering for your own demise Starting tonight, people will die People will die! Time bomb, ticking away, ticking away Scare the hell out of you Earth is on hell, earth is on hell Welcome to your earth on hell The worse that it gets, the better it sells Time for the fall, so say we all Starter of anything, ender of everything You made this sick hell on earth Spitting your poison infected at birth Taking the streets occupied Starting tonight, people will die People will die! Time bomb, ticking away, ticking away Scare the hell out of you Earth is on hell, earth is on hell Ohhh, I'm getting out of line It's like I lost my mind Earth is now on hell Ohhh, I'm getting out of line I fucking lost my mind Earth is now on hell!!! The kids have gone wild in the streets No longer the stepchild you beat They're taking it hard, kill the old guard Starter of anything, ender of everything Coming to kick you to sleep It's reap what you sow, not sow what you reap Cheering for your own demise Starting tonight, people will die People will die! Time bomb, ticking away, ticking away Scare the hell out of you Earth is on hell, earth is on hell
