

# Anti-Flag, Die for the Government

You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
There's a gulf war vet, dying a slow, cold death  
And the government says, "We don't know the source of his sickness"  
But don't believe what they say, because your government is lying  
They've done it before and don't you know they'll do it again  
A secret test, government built virus  
Subject test group gulf battle field troops  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
First world war veterans slaughtered, by General Eisenhower  
You give them your life, they give you a stab in the back  
Radiation, agent orange, tested on us souls  
Guinea pigs for western corporations  
I never have, I never will  
Pledge allegiance to their flag  
You're getting used, you'll end up dead  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit  
I don't need you to tell me what to do  
And I don't need you to tell me what to be, fuck you  
I don't need you to tell me what to say  
And I don't need you to tell me what to think! What to think  
What to think, what to think, what to think, think, think, think  
You've gotta die, gotta die, gotta die for your government?  
Die for your country? That's shit
