## Antoine Clamaran, Reach For The Stars

I never thought I'd be out of the dark Deep in my heart, there was a longing To never give up anything that I start And I just can't believe that I'm here, and it feels good I just can't believe that I've come so far So come on, me I'm flying away I, I gotta reach for the stars, no matter how far they are I gotta believe in life, I'm catching the stars to shine I can't deny, the world is so crazy Sometimes I wish I could just fly to the moon I worked so hard, and I've gotten lazy I gotta shine, I know just what to do And I just can't believe that I'm here, and it feels good I just can't believe that I've come so far So come on, me I'm flying away

There was a time, I was so lonely

I, I gotta reach for the stars, no matter how far they are I gotta believe in life, I'm catching the stars to shine
To shine, to shine I, I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
To shine, to shine I, I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
I, I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
I, I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine.
