

Antoine Clamaran, Reach For The Stars (Original)

There was a time, I were so lonely
I never thought I'd be out of the dark
Deep in my heart, there was a longing
To never give up anything that I start
And I just can't believe that I'm here, and it feels good
I just can't believe that I've come so far
So come on, don't stop me to do this
I'm flying away
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
I can't deny, the world is so crazy
Sometimes I wish I could just fly to the moon
I worked so hard, and I've gotten lazy
I gotta shine, I know just what to do
And I just can't believe that I'm here, and it feels good
I just can't believe that I've come so far
So come on, don't stop me to do this
I'm flying away
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
To shine, to shine, to shine...
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
To shine, to shine, to shine...
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine
I... I gotta reach for the stars, no matter how far they are
I gotta believe in life, I'm catching the stars to shine.
