Anything Box, Need

Anything Box Elektrodelica Need (claude s.)

All i need is under the spell of words, Always there, trying to remind me of What and who i am...

All i need is high on the sea of stars, Shining down, trying to remind me of What and who i am...

A tear to catch when it all comes crashing Down, a loving face that tears away The frown, somebody who needs to Need, is all i needed...

All i need plays on my soft machines, Like a child, trying to remind me of what And who i am...

Even though i've seen the heavens fall With the taint of every heart we tore, In spite of the odds, my friend, It was all i needed...

All i needed...all i needed...
