

# ApologetiX, Monkey Scheme

Here they come, talkin' down on me  
I get the funniest looks 'cause I said I don't believe  
They say we were monkeys  
They think they're saying something profound  
But where's their missing link at? There weren't any bodies found

They built a man from a hog's tooth-They called a lie the truth  
And any time they get busted- They sell you something new  
They say we were monkeys  
I think that they've been monkeyin' around  
Cause they're too busy changin' their books and their studies 'round  
They're just tryin' to defend it- they got a lot to re-explain  
Where they've done excavation, they keep uncoverin' mistakes

Any time or any where- just look over the boulders  
you'll see that man's been there  
They say we were monkeys  
I think their heads are stuck in the ground  
Cause they're too busy diggin' and putting the Bible down

(spoken:) Java Man was the skull of a gibbon  
Nebraska Man was the tooth of a pig and  
the Pitdown Man was a low down sham  
They built that man form an orangutang  
Ramapithics wasn't complete he's a fragment of jaw and a couple of teeth  
additional skeletons show us today that he isn't our relative- only an ape  
Australapithicus alias Lucy the fossil of this was just vague and confusing  
the wonderful knee bone they're proud to possess  
was 200 feet deeper- a mile from the rest  
Neanderthal Man was prob'ly deficient  
in Vitamin D of it might've been rickets  
but he had religion and musical instruments  
fire and tools and from you he's no different

(sang:) They say we were monkeys  
But people came from dust in the ground  
But they're too busy thinkin' to look into what we've found  
They're just kinda pretending, but I know why they seem afraid  
If we come from creation, you need God's son to be saved  
They say we were monkeys but there was no evidence found  
Still you'd better get ready- They'll make it up anyhow
