

Arapaho, Our Generation

Arapaho

1, 2 Mile From Eden

Our Generation

We've got some problems I know we need to solve

With faith and education there will be some resolve

I know that we are paying for what our fathers have done

So dance to the flame of freedom

In the eyes of everyone

But it's all for nothing

If you know what I mean

If we don't all gather round

Our generation

With destination

So we've all been told now to try and tow the line

How the hell dowe do that unless we're working all the time

We've got to stop the crime now so we can have tomorrow

So the rainbow nation can dance together

So a good life wil follow

But it's all for nothing

If you know what I mean

If we don't all gather round

Our generation

With destination
