

Ari Koivunen, Raging machine

Calling in silence, deep in our souls
Hunger grows more
It lightens our way higher up to the goal
(We'll stand up and fight!)

The vision is clear
(We'll ride trough the night!)

Without any fear
Louder and faster with power we play
This raging machine is blocking your way
We're crushing you under and you will become
The one who survives and never lets us down
You'll stand on our ground
Hearts on the run, we are always alone
Longing for home but never give up, we are here to be shown
(We'll stand up and fight!)

The vision is clear
(We'll ride trough the night!)

Without any fear
Louder and faster with power we play
This raging machine is blocking your way
We're crushing you under and you will become
The one who survives and never lets us down
You'll stand on our ground
