

Ariel Pink, Let's Build a Campfire There

Red woods are passing along
When I am closed in the dark
The air is cold and this (expression's) old
When the flowers really aren't all there

Let's make a campfire there (x4)

Let's put some wood on the sand
Let's put the twigs in our hands
(it's taking[?]) (time)(for the[?]) nature's (timesake)
We just can't compare

Let's build a campfire there (x2)
Let's make a campfire there (x2)

You were sitting by the fire
And I just watched from far away
Something out there made you smile
And the forest was cold, but my body was warm
It finally felt like this was our home
And right then I ran all the way back
Into your arms

There's love in my heart like a tree
It's here that I long us to be
Your face is so bright, like a distant porchlight
For a stranger who's far from home

Here with my fist in your hair
Such hesitation inside
Let's make a campfire there (x8)
