

Arkarna, Copper Colored Pony

There's that copper colored ponie
And that air that smells like rain
The moon was out in daytime
When I first heard your name
Your name is just like the moon
It sounds so bright
But when you're in the room
The mood just feels so right

And I say
I've got this feeling that won't go away
All I've gotta do
Is think about you
Every night and every day

And every night I dream
That I'm
Saddled on that copper colored pony
With you

I can't wait
For that day
