

Asher Lane, Explain

What you feel inside
Describe it with your eyes
Describe it in a way that makes me sigh

Why do we waste our precious time
Living in denial
Of what we both are trying to find

Don't make me explain
What I feel for you
When you're around me, when you're around me
Don't make me explain
Just let me show you
Now that you found me I'll take your words away

All you need to know
We can let it go
We can be free for so much more

There's no need for words
After you have heard
A thousand words
It's all absurd

Don't make me explain
What I feel for you
When you're around me, when you're around me
Don't make me explain
Just let me show you
Now that you found me I'll take your words away

Don't turn away
If you can't relate
To the words unsaid
Between the lines
Cause I can tell
By the look on your face that we
Don't need time
Let me change your mind

Don't make me explain
What I feel for you
When you're around me, when you're around me

Don't make me explain
Just let me show you
Now that you found me I'll take your words away
