

Ashlee Simpson, That's Why I Love You

because the way we kiss is better than any drug
because when I'm with you I believe in love
'cause you take chances most people would never take
you go out on a limb and your not afraid to break
and it gives me faith
I thought I'd never find someone as crazy as myself
no matter what I've done
you always come when I cry for help

that's why I love you
and thats why I love you
there's no one in this world
anything like you
thats why I love you

because the times I hurt you always understand
because you cure me with the sweet touch of your hand
because your not afriad to come off like a fool
without trying baby you define the truth
and you make me laugh
I thought I'd never find someone
who can see through my eyes
u always know when I tell the truth and when I telling lies

and thats why I love you
thats why I love you
theres no one in this world
anything like you
thats why I love you
oh oh

no one and nothing baby
could ever tear us apart
lets stick together baby
nothing will hurt us

that's why I love you
that's why I love you
there's no one in this world
anything like you
that's why I love you
that's why I love you
that's why I love you
there's no one in this world
anything like you
that's why I love you
