

# ATB, Let U Go (Airplay Mix)

I've been to all the familiar places  
I've been running like a sentence, never begun  
I've been looking for a way to let you know  
I got nothing left to fill the spaces  
I got nothing but a sentence coming undone  
I've been doing circle and did shows  
I've been to all the familiar places  
I've been running like a sentence, never begun  
I've been looking for a way to let you know  
I got nothing left to fill the spaces  
I got nothing but a sentence coming undone  
I've been doing circle and did shows  
Every cloud in the sky  
Every place that I hide  
Tell me that I  
I was wrong to let you go  
Every sound that I hear  
Every thought that I fear  
Tell me that I, I was wrong  
I was wrong to let you go

Let you go, let you go, let you go  
It's the little things that make you crazy  
Like the flutter of someone touching your skin  
I can see you everywhere I go  
You could be inside a sea of faces  
It could be the rumor of your grin  
Swimming in the river as it flows  
Every cloud in the sky  
Every place that I hide  
Tell me that I  
I was wrong to let you go  
Every sound that I hear  
Every thought that I fear  
Tell me that I, I was wrong  
I was wrong to let you go  
Every cloud in the sky  
Every sound that I hear  
Let you go
