

# Atom And His Package, Avenger (Rock Version)

ever think to yourself about an option?  
a different way to be?  
lets round up the no good doodz and put 'em on an island, in the middle of the sea.  
i thought of a plan two years ago.  
it seemed to solve any single problem, that is, i think i ought to know.  
it involves a heavy piece of machinery,  
that has the responsibility of lifting an entire country.  
#1 i pick up that butt-face from the Deadguy show (who beat me up for no reason).  
#2 comes the entire canadian border patrol (who stole money from me)  
sometimes its hard to believe that they're bretheren of you and me.  
i got an excellent idea, build an island where we put the rest of the world,  
or maybe just you and me.  
here's how it works. i use the crane to pick up isreal,  
and softly place it in wyoming, where it thrives real well.  
single-handedly i solved the middle east,  
and on the way i got a nobel prize, for peace.  
#1 i pick up that guy from the Deadguy show .  
#2 i scoop up the entire canadian border patrol  
sometimes its hard to believe that they're bretheren of you and me.  
i got an excellent idea, build an island where we dump the rest of the world,  
or maybe just you and me.
