

Audioweb, What Do You Want

Sometimes I wake up in a bad mood
Sometimes I don't wake up at all
Sometimes you hold me back and set me on
When all I really hear is your poison ...

One time I get back and I'm really moved
Sometimes you don't move me at all
We've lost our way and there's no way back
It's time to live my life just the way I choose

Chorus:
What do you want from me
Why do you care about me

And now I leave this place you call my home
For me it isn't home at all
This struck me and I'm losing
When you get back you'll find me gone

Sometimes I wake up in a bad mood

Full of troubles in my head
One day I leave you but now it's not the time
Sometimes when I wake up, I don't wake up with you

Chorus

Is my life not with you
It's time to go my friend
It's the end, it's the end
The end of the line
Taken time to know myself
It's time to go for me
Oh, no

What do you want from me, my selector
What do you want from me, operator
What do you want from them, my selector
What do you want from me, my selector

???
