

Avion, Bulletproof Glow

When the music starts to fade
And I'm left without a friend who knows me here
As the season brings a change
All the clouds and questions drift and disappear

It's so delightful watching the nightfall
After the dark a new day

Bulletproof glow shine again for the city of angels
Ride it in on a helicopter stunt for free
Bulletproof glow shine on for the city of angels
Illuminate the sky and the heart of me

What's the purpose in the plan
With contempt they cut you down to make their case
Re-election close at hand
Running with the pleasure of Eric Liddells face

What does it all gain as earth and the worm claim
Back to the place you belong

Bulletproof glow shine again for the city of angels
Ride it in on a helicopter stunt for free
Bulletproof glow shine on for the city of angels
Illuminate the sky and the heart of me

They will not win
They will not win
They'll never break me
They will not win
They will not win
