

# Axenstar, Far From Heaven

[M: T. Eriksson, L: P. Johansson]

You have shown me the stars tonight  
Yet I can still see shadows in the light  
Dimensions of time are hidden in the sky  
The stars are falling I'm always wondering why

The wind of ice has embraced my soul  
Before you I will never fall  
I can take you through the pain and sadness  
As we're running from rage and madness

[BRIDGE]

Beyond the sky in the dead of the night  
Candles are burning, stars of returning  
Lightning strikes again

[CHORUS]

Now I am far from heaven far from the light  
Sent from the darkest lands death on black wings  
Found my heaven deep in the night  
Riding through the clouds to the sleeping kings

How many seasons can I gather in my land  
I come from hell with might in my hand  
But will my poisoned tears ever bleed at all for you?  
My journey from heaven to hell is true

Now the time has come for you to fall  
In the end you won't see me at all  
Alone in this cold world we'll be  
Fighting me as I was your own enemy
