

Axxis, Angel

Hello you little girl
What is wrong with your world?
Let me hold you my dear
Don't be scared cos' I know
All the bad dreams will go
I will drive away your fear
Hello you, little girl, I'm always by your side
Come close - close to me in this night
All the witches and elfs
I have seen by my self
... A long time ago
Some are good, some are bad
You don't have to feel sad
'Cos I'm always with you
You must know - every time - there's somebody at your side
There's someone - taking care - day and night
You've got an angel right beside you
Your helping hand - from heaven send
You've got an angel - always invisible
No more tears - it's hurting me, my dear - my child in fear
Don't be afraid now,
Don't feel sad now
'Cos I know all the bad dreams fade away
You've got an angel right beside you
Your helping hand - from heaven sent
There is an angel - always invisible
No more tears - it's hurting me, my dear - my child in fear
