

# Axxis, Hide Away

Like a black bird in the night  
The shadows walk on ice  
I will float down silently  
Like a soul in flight  
Bringing you my gift tonight  
Put in words of love  
Kisses like the coldest night  
Come from high above  
I was exiled to my dyin'  
Captured by a spell  
Mourning keeps my spirit flyin'  
Out of my cold cell  
'Cross the field of separation  
To the house of pain  
Slippin' through the bedroom window  
Next to you again  
So now you know - you can't hide away  
I come and go - there's no hide away  
So now you know - you can't hide away  
I come and go - there's no hide away  
I come and go  
When the twilight promises  
A new day to begin  
You'll find my place beside you  
Is cold again  
You may feel an other's touch  
But in your soul and heart  
I'll keep stayin' for all time  
As long as we're apart  
So now you know - you can't hide away  
I come and go - there's no hide away  
So now you know - you can't hide away  
I come and go - there's no hide away  
I come and go
