

# Axxis, Shadows Of The Light

Can you read the stars - look in the future  
Can you see what's going on with me  
Feel the beat - the rhythm of the living  
There is no time - there is no time...  
...open my eyes...  
Shadows are crawling on the wall of conscience  
How do you feel when thoughts fill up your mind?  
You never can hide - that night - all visions  
Please foresee what will be with me life  
And you get a flash - you get a light  
All the pictures in your mind  
Are living in that twilight zone  
Shadows of the night. Shadows of the light  
Never really hide with a second sight  
A flash - A light - A sign  
Shadows of the night. Shadows of the light  
I can feel the magic might  
It is not easy - walking in your mind with a second sight  
Can you believe in stars and see the future  
Would you change your life just 'cos you know  
If I should know when I will die,  
Would I be crazy or would I cry  
I would give up my life and my soul  
And I get a flash - get a light  
All the pictures in my mind  
Make life dependent of that twilight zone  
Shadows of the night. Shadows of the light  
Never really hide with a second sight  
A flash - A light - A sign  
Shadows of the night. Shadows of the light  
Living in a prison of a magic might  
Walking in your mind with a second sight  
And the devil's dance goes round and round  
You run yourself into the ground  
By keeping all the secrets  
Shadows of the night. Shadows of the light  
Living in a prison of a magic might  
The stars - The spell - Twilight  
Shadows of the night. Shadows of the light  
In the twilight zone you are on your own  
Walking in your mind - With second sight
