

# Aztec Camera, Sunset

Words and music by Roddy Frame

Sand separates the sea  
From me on my desert island  
Sun obliterates the sky  
And I, I'm just like anyone  
No matter how I try  
I wanna see the sun.  
And it shines  
To illuminate the distance  
Illustrate the difference  
Between you and me  
And it collides with clouds  
That set the sky free  
Indicating right, indicating wrong  
I'm just like anyone  
I wanna see the sun.  
Moon through many stages move  
And light love  
Like a silent L.D.  
Swoon and every single kiss  
You ever lit like this  
Is gonna feel like bliss  
So just reflect the sun  
And guide everyone.  
And it shines  
To illuminate the distance  
Illustrate the difference  
Between you and me  
And it collides with clouds  
That set the sky free  
Indicating right, indicating wrong  
So just reflect the sun  
And guide everyone.  
A cable car above the bay  
Below the stars saying "are you okay?"  
To the one you love.  
It sings like a song  
As it strings you along  
You suspend your belief  
There's no need, baby I've gone there  
Stars shone there.  
And they shine  
To illuminate the distance  
Illustrate the difference  
Between you and me  
See them collide with clouds  
That set the sky free  
Indicating right, indicating wrong  
And just like anyone  
I wanna see the sun  
I wanna see the moon  
I wanna see the stars  
I wanna see them shine.
