

# Bad Boys Blue, Lady In Black

Deserted place and so far from home  
I was alone, I was all on my own  
The moon was shining, I saw her face  
A magic woman all dressed in a lace  
She gave me a sign and I followed her  
To a house of light somewhere in the night  
Behind the window the symbols of red  
Painting the face of the lady in black  
Behind the window I'll never forget  
The magic lady, the lady in black  
She'll never come back  
The lady's beauty was so divine  
She took my heart with her heavenly smile  
When I reached out just to kiss her hand  
I suddenly tumbled down in the sand  
There was broken lace lying on the ground  
And the house of light was fading in the night  
Behind the window the symbols of red  
Painting the face of the lady in black  
Behind the window I'll never forget  
The magic lady, the lady in black  
There was broken lace lying on the ground  
And the house of light was fading in the night  
Behind the window the symbols of red  
Painting the face of the lady in black  
Behind the window I'll never forget  
The magic lady, the lady in black  
Behind the window the symbols of red  
Painting the face of the lady in black  
Behind the window I'll never forget  
The magic lady, the lady in black  
The lady in black  
The lady in black
