

# Bad Religion, Modern Day Catastrophists

Take those potatoes out of your ears  
Listen to the warnings, verify all your fears  
There's a world outside that's ready to blow  
And we're all to blame when it finally explodes  
You gotta listen up  
Gotta listen to what they're saying to you  
Gotta listen up  
And think about what they're telling you  
Temperature is rising above the odorous rain  
Well maybe it's a light of what we throw away  
If we don't reuse what's around and free  
My kids can't throw away their comic book fee  
You gotta listen up  
Gotta think about what I'm telling you  
Gotta listen up  
And think about what I'm saying to you  
They're the modern day catastrophists  
They've got practical solutions  
They're the self-appointed righteous pragmatists  
And they know fifty ways to save the world  
What makes you think you can cure our disease?  
Maybe it's just a biology  
Maybe it's time to make room for another species  
Delete the 21st century  
You gotta listen up  
Gotta think about what they're saying to you  
Gotta listen up  
And think about what they're telling you  
They're the modern day catastrophists  
They know all the right equations  
They're the self-appointed righteous pragmatists  
And you too can be one of the few to save the world  
But you gotta listen up  
And think about what they're telling you  
Gotta listen up  
And do exactly what they tell you to  
They're the modern day catastrophists  
Modern day catastrophists  
Modern day catastrophists  
Modern day catastrophists  
Modern day catastrophists  
Modern day catastrophists  
Modern day catastrophists
