

Ball In The House, Something I Don't Know

Not wasting time 'till I open my eyes
There is a girl I thought I knew she waits for me, a stranger
Don't let it end this way
There has gotta be something to say
Tell me something that I don't know
How to save what we've got, turn lead to gold
Tell me something that I don't know
How to open your heart before I let it go (let it go)
I can feel you slipping away, I can barely see you at all
I know that things change, but I just can't let you fall
Don't let it end this way
There has gotta be something to say
Tell me something that I don't know
How to save what we've got, turn lead to gold
Tell me something that I don't know
How to open your heart before I let it go
How many nights must I fall asleep without you in my arms
As I try to find a way to keep this from tearing us apart
Please tell me something that I don't know
How to save what we've got, turn lead to gold
Tell me something that I don't know
How to open your heart before I let it go
[repeat]
Before I let it go, before I let it go
Oh I, can't be so brave
