

Barbra Streisand, If I Never Met You

If I never met you, if I never saw your face
This world, this world would be a colder place
I bet if we'd never met
If I never met you, if I never knew your love
My life, my life might be a sad song of regret
If we'd never met
But we said one hello
And look at how the world begins to spin
Look at how the shadows disappear
Now that you are here
If I never met you, if I never felt your kiss
My days, my nights would not be filled like this, it's true
I don't know who I'd love
I don't know what I'd do if I never met you
Just look at how the shadows disappear
Now that you are here
If I never met you, if I never felt your kiss
My days, my nights would be filled like this, it's true
I don't know who I'd love, I don't know what I'd do
If I never met you
I don't know who I'd love, I don't know what I'd do
If I never met you
