

Beastie Boys, Live Wire

I know where you got to be going but you don't know why
I see things I ought not to know but I can't help life
You never knew my heart for you was monster size

You're a live wire
You're a live wire

Let me know if you want to check out for the all time high
My man told me long hellos and short good byes
But you are something else I love you please don't die

You're a live wire
You're a live wire
