

Beatsteaks, Monster

kick it kick it
oh oh you've got it
don't turn around you're driving now
it's all allowed and double-checked
make every second of it count
and then you take her out
and then you rise above
you're gonna make it up and then you take her away
her name in blood across the heart
you linger she falls apart
into your arms
and then you take her out
and then you rise above
you're gonna make it up
and then you take her away
she will turn you into a monster
