

Bee Gees, Another Lonely Night In Ny

Baby, oh no, I've been stuck here
I've been searchin' so long
Baby, don't go, millions of people were wrong
In the dark of the cold light of day
I will still be here
If my heart and my soul had their way
You would still be here
Another lonely night in New York
The city of dreams just keeps on getting me down
'Cause my baby's no longer around
And my feeling can never be found
Another lonely night in New York
And my sorry eyes are lookin' out on the world
Baby, you said, a guy like me was way out of line
And knowing today, you're leavin', was a question of time
In the mist of a sweet summer rain, you will find me here
Should the sparkle of stars lose their way
I'll be holdin' near
Another lonely night in New York
The city of dreams just keeps on getting me down
'Cause my baby's no longer around
And my feelings can never be found
Another lonely night in New York
And my sorry eyes are lookin' out on the world
In the dark of the cold light of day
You will find me here
If my heart and my soul had their way
You would still be here
Another lonely night in New York
And I'm just a soul in the heart of the city
Just another lonely night in New York
The city of dreams just keeps on getting me down
Just another lonely night in New York
