

Bee Gees, Country Woman

Country women now
What you gonna do with your life?
Country women now
Why don't you get out of this life?
Leave my life alone
The first time I met you, I knew you were the devil's daughter
You came on like a river, doin' all the things you oughta
You're a self made woman, baby, not a made-to-order
If you had your way, I know you'd make me stay
And that would only bring me down
Country women now
What you gonna do with your life?
Country women now
Why don't you get out of this life?
Leave my life alone
Country women, country women
Country women, country women
Country women
Country women now
What you gonna do with your life?
Country women now
Why don't you get out of this life?
Leave my life alone, leave my life alone
Country women now, country women now
Country women now, country women now
Country women now, country women now
