# Bee Gees, Dimensions

Hindsight, don't make it right
She give me trouble enough
And she's a ball of light
I'm in the tunnel of love
With the American dream
And I was born too soon
A little good luck, never stuck
She got me climbing the walls
Got me hard as a rock
Within a city of sin, she got a city block
And she was barkin' at the moon

She likes to show
So many sides to her
And I'd be the one to know

(CHORUS)
When am I gonna go to your dimension
When am I gonna go to where you are
When am I gonna go to your dimension
Dimensions of each other keep us goin' strong

Black knight, take a bite
She can double it up
And she's a way of life
And whether dead or alive
She got a fix on me
And I was dancin' in the fire
White steam, never seen
In every muscle and bone
She was a love machine
And she could wrestle me down
And get a taste of me
In her web of desire

She changed my world
How can the body know
It's touchin' me or her

(CHORUS)
