

# Bee Gees, Smoke And Mirrors

When I was a boy all the books I read  
I followed like a blind man  
To heed the words my father said  
Those golden summers fade into night, words become a dream  
The echoes of my childhood and where the path is winding  
May God bless you, keep you safe from all harm  
I stand by you always  
Time and motion hands touch  
Lips find a way to heaven on high  
Watch the children play, the child becomes a man  
And all the tangled webs we weave  
You swear it as we live and breath  
We stay together death until you part  
Winner takes the prize  
The futures at your finger tips, right before your eyes  
No more sorrow (smoke and mirrors)  
No more nights with no end  
(I really learned a lot, smoke and mirrors)  
I see my tomorrows  
And nothing from nothing  
And ashes to ashes they say  
All the more that you reach out  
The more that it runs away  
(Smoke and mirrors)  
No more goodbyes  
(That's all I ever got, smoke and mirrors)  
No lies, you find your way there  
(She show me what she's got, smoke and mirrors)  
Heaven on high  
May god bless you keep you safe from all harm  
I stand by you always  
Time and motion  
(smoke and mirrors)  
Hands touch, lips find a way to  
(That's all I ever got, smoke and mirrors)  
Heaven on high  
No more sorrow  
(I really learned a lot, smoke and mirrors)  
No more nights with no end  
(She show me what she's got, smoke and mirrors)  
I rise or I fall  
no more goodbyes  
(She really makes me hot, smoke and mirrors)  
No lies, you find a way there  
Heaven on high
