

# Big Sugar, La Stralla

(G. Johnson/A. Whiteman)

Naked baby on the ground  
Only sky above  
Hallelujah in my little honey  
My only thought is love

Woman got hands like starfish  
Pushing me into the night  
She's wheeling wheel  
Coming into sight

In this time, as I was saved  
You were where you belonged  
Somebody got to help me  
'Cause I can't help myself

When your body is shaking  
Don't forget to look at your mind  
I'm looking in your face, pretty baby  
I can see you're looking in mine

Everyone lost their senses  
Drown in shifting sands  
Your one foot walks on water  
One touches land

You've been through the window  
You've held the cup with your eyes  
And now it's running over  
Well, I had to leave the light

When your body is shaking  
Don't forget to look at your mind  
I'm looking in your face, pretty baby  
I can see you're looking in mine

I'm looking in your face, pretty baby  
I can see you're looking in mine  
I'm looking in your face, pretty baby  
I can see you're looking in mine  
I'm looking in your face, pretty baby  
I can see you're looking  
Don't you start looking, pretty baby
