

Bill Nye, All In Motion

We're all in motion
We're all in motion
Everything in the universe
Is all in motion
When things are pushed or pulled
They're put in motion

The more the mass
The more force we need
The more inertia
The more force we need
We're all in motion
That's what it seems

We're all in motion
We're all in motion
Everything in the universe
Is all in motion
When things are pushed or pulled
They're put in motion

The more the mass
The more force you need
The more inertia
The more force you need
We're all in motion
That's what it seems

We're all in motion
We're all in motion.
