

Bill Nye, Let's Talk About Stress

Let's talk about stress, baby
Compression and tension, see
Let's talk about buildings, bridges,
Teeth and eggshells, all these things
Let's talk about stress
Let's talk about stress
Let's talk about stress
Let's talk about stress

Let's talk about stress
It's all the best things in life we know
Like flakes of snow
And even our hands, strike up the band
As we talk about stress, that's the matter at hand
Cuz the buildings, bridges, things we depend on
Keep on standing even though we stand on them
They don't fall down
Cuz the people that build them understood about stress

Let's talk about stress, baby
Compression and tension, see
Let's talk about trees and plants and
Teepee structures, all these things
Let's talk about stress
Let's talk about stress
Let's talk about stress
Let's talk about stress
