

Bill Nye, My Favorite Star

It's a supercharged ball of gas
I'm talkin' about the sun
Makin' energy with a solar blast
Fusion's so much fun
Ooh, it's a power plant
Heating up everything
Cars and rocks and nuclear plants
Ballerinas and baseball swings

Exploding
And fusing
And rocking
And rolling
It's my favorite star!

Solar winds blow through the air
The northern lights look nice
More sunspots mean hotter Earth
Less spots mean cold as ice
Ooh, it's a real hot shot
But doesn't radiate heat
Earth absorbs the sun's rays
And makes heat, ain't that neat

Exploding
And fusing
And rocking
And rolling
It's my favorite star!
