

Bill Nye, One Zero 001

One zero zero zero one
One zero zero zero one
One zero one one
One one zero one one
One zero one one zero one

Know computers
Aughta know computers

Computers are just tools that convert information
You oughta know by now cause they're all across the nation
Aughta know computers
They're a complicated set of on and off switches
If one command is wrong, baby they will have some glitches
Aughta know computers, aughta know computers, aughta know computers

One zero zero zero one
One zero zero zero one
One zero one one
One one zero one one
One zero one one zero one

I must confess
Girl, yes, I wanna know computers
Help me out, want you to be my tutor
What's a bit and what's a byte?
In front of my monitor late at night
It's not just a calculator
Airplanes use them as navigators
You can be my troubleshooter, aw yeah
I wanna know computers
