

Bill Nye, The Wind Is In Your Hair

Dig

The wind that you feel
In your face, what a thrill
That blowing action moves things around
That gusty action above the ground
Wind can even create power (I-I-I-I-I)
Wind can knock over a tower
The force of a gust of wind
Can make this here windmill spin
Which can become electricity
Wind can even create power (I-I-I-I-I)
Wind can blow away this flower

Wind is in the a-a-a-air
Wind is in your ha-a-a-air
Wind is over the-e-e-ere
Wind is everywhe-e-e-ere

The wind that we all share
Dances around in our hair
It's circulation
Keeps all it moving
Wind keeps on blowing by the hour (I-I-I-I-I)
Wind can knock over a tower
Air can flow
Leaves and flags show
Air pressure changes make it go
It's not visible or consistent
Just gusty and persistent
Wind can even create power (I-I-I-I-I)
Wind can blow away this flower

Wind is in the a-a-a-air
Wind is in my ha-a-a-air
Wind is over the-e-e-re
Wind is everywhe-e-e-re

(What have, what have, what have you seen the wind do?
What have, what have, what have you seen the wind do?
What have, what have, what have you seen the wind do?
What have, what have, what have you seen the wind do?)
