

Bill Nye, We Will Find You

Buddy ate my bran
Took this pop can
Know it from his hair
'Cause I took it to the lab today

You left spit on the ground
It's what I found
Fibers and fluids and clues all around

Singin'
We will we will find you
We will we will find you

I've been to school
Studied much crime
Asked the right questions
Who what where when and why
DNA tests
I've done a few
I've seen my share of blood through microscopes
It's what I do!

We use my forensics my friend
And we'll reconstruct what happened when
We use my forensics
We use my forensics
No time for guesswork
Cause we we use my forensics
In the world
