

Billy Crawford, Our Night

I started dreaming of you, long before I ever met you
And now you're in my room
I'm so afraid, so scared of you
I'm gonna meet you at the door with a rose, and you know that
I've been praying all my life for this special night

I want just the right light
Before I hold you tight
Because this is our night
I just want to cry
I'm on a natural high
'Cause I think you love me too
I think you love me too

Do you have any idea, how many years
I've been looking for you?
And here you are in my room, I'm losing control
I won't rush you
I'm gonna meet you at the door with a rose
God knows that I've been waiting
All my life for this special night

I want just the right light
Before I hold you tight
Because this is our night
I just want to cry
I'm on a natural high
'Cause I think you love me too

I want just the right light
Before I hold you tight
Because this is our night
I just want to cry
I'm on a natural high
'Cause I think you love me too
Yes I think you love me too

I'm gonna meet you at the door with a rose, and you know that
I've been praying all my life for this special night

I want just the right light
Before I hold you tight
Because this is our night
I just want to cry
I'm on a natural high
'Cause I think you love me too

I want just the right light
Before I hold you tight
Because this is our night
I just want to cry
I'm on a natural high
'Cause I think you love me too
I think you love me too
